DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a certified English translation of the foreign application must be submitted in reply to this action. 37 CFR 41.154(b) and 41.202(e).

Failure to provide a certified translation may result in no benefit being accorded for the non-English application.

Specification

Claim 8 is objected to because of the following informalities: Claim 8 is not present in the application although a preliminary amendment has been filed for claim 8. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Claims 1, 2, 5 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Wygnanski [US 6,598,621].

Claim 1, Wygnanski discloses a magnetic drive for a switch, in particular for an electric switch [abs, the magnetic drive can be used for opening and closing electrical contacts] having an armature [10, 22] which is linearly displaceable between two end positions of a space [figure 1], with at least one movable switch contact [not shown but would could be 20 or 26, abs, the magnetic drive can be used for opening and closing electrical contacts], having a shunt body [40] made of a magnetizable material and arranged at a distance from the armature [figure 1] essentially on the axis of displacement of the armature, and having means [12, 12, 36, 38] for generating a magnetic field which exerts a retaining force on the armature holding it in the end positions [up or down], where the course of the flux lines of the magnetic field is altered by bringing the shunt body [40] together with the armature so that the retaining force acting on the armature is reduced, wherein a lock means [42] for the shunt body, by which the shunt body can be held in the end position facing the former and can be released from the end position by exerting a low force or power [col. 10 lines 21-53].

Claim 2, Wygnanski discloses the magnetic drive according to claim 1, wherein the shunt body [40] can be locked in the end position [up against 12 and 14] by means

of mechanical holding devices [42, a de-energized piezo bender is straight, col. 10 lines 26-30].

Claim 5, Wygnanski discloses the magnetic drive according to claim 1, wherein the shunt body [40] can be locked in the end position [up against 12 and 14] by means of the magnetic holding means [40 is attracted to 12 and 14, col. 10 lines 26-30].

Claim 7, Wygnanski discloses the magnetic drive according to wherein the electric switch [abs] is closed in the end position of the armature [10, 22] facing away from the shunt body [40, if the electrical contacts are 20], and it is open in the end position of the armature [10, 22] facing the shunt body [40, if the electrical contacts are 20].

Allowable Subject Matter

Claims 3, 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BERNARD ROJAS whose telephone number is (571)272-1998. The examiner can normally be reached on M and W-F, 10:00-7:00.

Application/Control Number: 09/700,043

Art Unit: 2832

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin G. Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
